EDUCATION

M.S. Data Analytics and Information Systems

Jan. 2022 - Dec. 2024

Shepherd University, Shepherdstown, WV

GPA: 3.83/4.0

Relevant Coursework: Machine Learning, Big Data Analytics, Statistical Analysis, Business Analytics, Database Systems

B.S. Computer Engineering

Aug. 2017 - Dec. 2021

Shepherd University, Shepherdstown, WV

GPA: 3.45/4.0

WORK EXPERIENCE

Data Analyst (Customer Engagement)

May. 2025 - Present

SU Wellness Center | *Shepherdstown, WV*

- Analyzed engagement and retention trends for 3,000+ students and community members across wellness programs, fitness facilities, and aquatic services.
- Developed real-time Power BI dashboards and defined membership KPIs, resulting in a 25% growth in renewal rates and improved data-driven decision-making.
- Built churn prediction models using SQL and Python, enabling targeted outreach that prevented over 100 member losses and protected \$50K+ in revenue.
- Conducted segmentation analysis to personalize offerings and boost under-engaged member participation by 30%, while training staff to interpret dashboards and reduce ad hoc reporting requests.

Data Scientist (Intern)

Jun. 2024 - Feb. 2025

Abt Global, Inc. | *Rockville, MD*

- Developed a machine learning-powered self-service tool to identify compensation disparities (85% accuracy), enabling HR and leadership to make data-driven decisions for 3,000+ employees.
- Automated the model lifecycle with Python and Oracle FDI; resolved 50+ data quality issues and improved HR analytics reliability by 20% through rigorous validation and testing.
- Built ETL pipelines and SQL-based dashboards that cut analysis turnaround time by 50%, enabling real-time insights and earning cross-team recognition.
- Presented insights through Power BI dashboards to 200+ stakeholders, translating complex data into high-level recommendations that informed cross-functional decision-making and accelerated policy changes.

Data Reporting Assistant (Member Services & Sales Analytics)

Dec. 2018 - Jul. 2021

Shepherd University | *Shepherdstown, WV*

- Built automated weekly and monthly reports tracking sales and membership trends using Excel and SQL.
- Supported data entry, cleaning, and validation in internal CRM systems, improving report accuracy by 30%.
- Collaborated with program coordinators to deliver ad hoc performance reports and visual summaries using Power BI, influencing program and pricing decisions.
- Analyzed seasonal membership patterns with Excel pivot tables and SQL queries, generating insights that supported upsell strategies and marketing campaigns.

LATEST PROJECTS

Olympic Data Engineering Pipeline | PySpark, SQL, Power BI, Azure Databricks

Jun. 2025 - Jul. 2025

- Built an end-to-end Azure data pipeline that ingested and processed 11K+ athlete records across 40+ sports using PySpark and SQL in Databricks; delivered actionable insights on teams performances via a Power BI dashboard.

Page Performance A/B Testing | Python, SciPy, Statistical Analysis

Mar. 2025 - Apr. 2025

- Uncovered a 28.6% engagement lift through A/B testing on landing pages, driving data-backed UI decisions.

TECHNICAL SKILLS

Programming Languages: Python, SQL, PySpark

Statistical & Machine Learning: Predictive Modeling, Classification, Regression, Time Series Analysis, A/B Testing, Hypothesis Testing, Feature Engineering, Model Validation, Exploratory Data Analysis, Statistical Analysis

Big Data & Cloud: AWS (EC2, S3, SageMaker), Hadoop, Apache Spark, Oracle Cloud, Azure (Databricks, Data Factory)

Databases & ETL: SQL Server, Oracle, ETL Pipeline Development, Data Warehousing

ML Libraries & Frameworks: Scikit-learn, TensorFlow, Keras, XGBoost, Pandas, NumPy, SciPy, NLTK

Data Visualization & BI: Tableau, Power BI, Matplotlib, Seaborn, Oracle Analytics Cloud

Industry Knowledge: Credit Risk Analytics, Lending Analytics, Financial Modeling, Statistical Analysis

Certifications: Google Data Analytics Professional Certificate, Machine Learning Specialization (Stanford/Coursera)
